Maksym Kacper Horoszczak

MECHANICAL ENGINEERING UNDERGRADUATE

maksym14@onet.pl

Turin, Italy

EDUCATION

Politecnico di Torino

Bachelor's in
Mechanical Engineering

2024 - present / Third year
Expected July 2027

TECHNICAL SKILLS

Design and build

SolidWorks
3D printing
Soldering
Basic electronics

Cost analysis

Excel
Bills of materials
Cost calculations

LANGUAGES

Polish
Native

English
Bilingual / C2

Spanish
Approximately B1

Chinese
HSK 3

INTERESTS

Skiing, sailing, scuba diving and model rocketry.

SELECTED PROJECTS

Custom 5-inch FPV drone

DESIGNED, BUILT AND FLOWN

Designed a dead-cat carbon-fibre frame in SolidWorks for agile flight and a forward-mounted camera. Prepared DXF cutting files and arranged manufacture.

Balanced the camera payload with rear battery placement, considering the centres of gravity and thrust. Designed component mounts and cut-outs to reduce frame material.

Assembled the drone, soldered its electronics and completed initial flights.

Lychee and Absorb

PUBLISHED iOS APPS

Built and released Lychee, a food and cosmetics barcode scanner with product scoring, and Absorb, a word-by-word RSVP reading app.

Manage product development, releases and distribution, with promotion currently focused on Lychee.

UNIVERSITY TEAMS

Squadra Corse PoliTO

2025 - 2026 / Cost and Manufacturing

Worked on bills of materials and manufacturing cost calculations for the Formula Student team, using Excel to organise component and cost documentation.

DRAFT PoliTO

2024 - 2025 / Micro autonomous-drone project

Contributed to the mechanical design of the team's miniature drone, intended for autonomous flight.
