Maksym [Surname]

Mechanical engineering undergraduate

[Email address] | github.com/iiMaximus

Bachelor's student in mechanical engineering at Politecnico di Torino, preparing to apply for a master's in aerospace engineering. Developing a drone project and mobile apps alongside my studies.

EDUCATION

Politecnico di Torino

In progress

Bachelor's in Mechanical Engineering

[Start year] - [Expected graduation]

[Add relevant coursework, thesis or academic projects, and grades if appropriate.]

SELECTED PROJECTS

Drone development

Ongoing

Developing a custom 5-inch carbon-fibre drone using DXF cutting profiles, with separate flight-controller and ESC mounting positions. An interactive reconstruction documents the frame and component layout.

[Add your role, CAD tools, design decisions, build photographs, and measured test results.]

Allergify, Absorb & Quarter

Ongoing

Continuing work on three mobile app projects exploring food information, learning, and time planning.

[Add technologies, individual contributions, development dates, and working demos or repositories.]

ACADEMIC DIRECTION

Master's study in aerospace engineering. Universities to be selected; preparing applications for November-December 2026.

TECHNICAL SKILLS & LANGUAGES

[Add verified CAD, engineering analysis, programming, manufacturing, and laboratory tools.]

[Add languages and proficiency levels.]

EXPERIENCE & ACTIVITIES

[Add relevant employment, internships, student teams, awards, or volunteering, if applicable.]
